Subject Index of Volume 226

Adhesion
  tribological transfer of polytetrafluoroethylenylene onto a diamond-like carbon film, 224
Aluminium
  X-ray photoelectron spectroscopy study of ultrathin oxide layers on Al and Si substrates, 219
Aluminium nitride
  investigation of thin AlN films for piezolayer-field effect transitor applications, 178
Aluminium oxide
  stability criteria for buckling of thin anodic films on aluminium, 74
  structural study of amorphous aluminium phosphate thin films by X-ray absorption spectroscopy, 207
  thermal conductivity of thin amorphous alumina films, 185
Amorphous materials
  analytic solution of an LPCVD reactor interwafer region, 15
  growth of oxide layers on CrSi–O films, 110
  on the macromolecular mechanism of dissolution of As_2S_3 films in organic solutions, 215
  role of substrate temperature and in-chamber annealing in H–Si bonding configuration in sputtered a-Si:H, 59
  temperature dependence of polarization holographic recording in thin films of $Se_{70}Ag_{15}I_{15}$, 119
  thermal conductivity of thin amorphous alumina films, 185
Anisotropy
  selective dissociation of merocyanine J-aggretates with linearly polarized laser light studied by optical second harmonic generation, 173
Anodic oxidation
  stability criteria for buckling of thin anodic films on aluminium, 74
  thermal conductivity of thin amorphous alumina films, 185
Auger electron spectroscopy
  Auger electron spectroscopy investigations of segregation in Au–Pd and Ag–Pd alloy thin films, 39

Boron nitride
  optical properties of cubic boron nitride films made by a reactive ion plating method, 82

Cadmium sulphide
  preparation and properties of electrodeposited ternary CdS_xSe_{1-x} and $Zn_xCd_{1-x}S$ films, 135
  variation of properties of electrodeposited CdS/CdTe solar cells deposited onto different transparent conducting oxide substrates, 259
Cadmium telluride
  variation of properties of electrodeposited CdS/CdTe solar cells deposited onto different transparent conducting oxide substrates, 259
Carbon
  optical absorption and photoluminescence of unhydrogenated amorphous carbon films, 99
Chemical vapour deposition
  analytic solution of an LPCVD reactor interwafer region, 15
  close-spaced vapour transport of $CuInSe_2$, $CuGaSe_2$ and $Cu(Ga,In)Se_2$, 254
  deposition of tantalum oxide films by ArF excimer laser chemical vapour deposition, 144
  investigation of microstructure and grain growth of polycrystalline silicon deposited using silane and disilane, 123
Cobalt
  ability of secondary-ion mass spectrometry to study the growth mode of deposit on a substrate: Case of cobalt deposition on (100) copper surfaces, 35
Conductivity
  electron conductivity of very thin metal films, 140
  valence manipulation and homojunction diode fabrication of chalcopyrite structure Cu–In–Se thin films, 149
Copper
  ability of secondary-ion mass spectrometry to study the growth mode of a deposit on a substrate: Case of cobalt deposition on (100) copper surfaces, 35
  electromigration-resistant Cu–Pd alloy films, 238
  growth and structure of f.c.c. Fe/Cu multilayers deposited on Si, 9
Crystallization
  growth and structure of f.c.c. Fe/Cu multilayers deposited on Si, 9

Deposition process
  analytic solution of an LPCVD reactor interwafer region, 15
  close-spaced vapour transport of $CuInSe_2$, $CuGaSe_2$ and $Cu(Ga,In)Se_2$, 254
  deposition of tantalum oxide films by ArF excimer laser chemical vapour deposition, 144
  kinetics of $TiSi_2$ thin film formation at a single-crystal silicon surface by the Ti ion irradiation, 191
  selective electroless Ni deposition on a TiW underlayer for integrated circuit fabrication, 87
Depth profiling
  junction formation and characteristics of the $CdS/CuInSe_2$/metal interfaces, 129
Dielectric properties
  structural study of amorphous aluminium phosphate thin films by X-ray absorption spectroscopy, 207
Diffusion
  kinetics of $TiSi_2$ thin film formation at a single-crystal silicon surface by the Ti ion irradiation, 191

Elastic properties
  elastic constants of f.c.c. {111} films. Part 1. Free monolayers, 230
  stability criteria for buckling of thin anodic films on aluminium, 74
  two-dimensional finite-element analysis of elastic stresses in double-layer systems under combined surface normal and tangential loads, 65
Electrical properties and measurements
  electromigration-resistant Cu–Pd alloy films, 238
  growth and dielectric characterization of yttrium oxide thin films deposited on Si by r.f.-magnetron sputtering, 156
  growth of oxide layers on CrSi–O films, 110
  junction formation and characteristics of the $CdS/CuInSe_2$/metal interfaces, 129
  variation of properties of electrodeposited CdS/CdTe solar cells deposited onto different transparent conducting oxide substrates, 259

Electrochemistry
variation of properties of electrodeposited CdS/CdTe solar cells deposited onto different transparent conducting oxide substrates, 259
Electromigration
electromigration-resistant Cu–Pd alloy films, 238
Electron microscopy
Auger electron spectroscopy investigations of segregation in Au–Pd and Ag–Pd alloy thin films, 39
Electron scattering
effect of specimen tilt on the measurement of film thickness and composition by back-scattered electron image contrast, 202
Epitaxy
elastic constants of fcc {111} films. Part 1. Free monolayers, 230
Etching
on the macromolecular mechanism of dissolution of As_2S_3 films in organic solutions, 215
Evaporation
modelling and characterization of columnar growth in evaporated films, 196

Fluorescence
intralayer and interlayer dimerization of rhodamine 6G in Langmuir–Blodgett films, 275
Fourier transform infrared spectroscopy
role of substrate temperature and in-chamber annealing in H–Si bonding configurations in sputtered a-Si:H, 59

Gold
reflection XAFS from a Au/In composite film, 161
Growth mechanism
ability of secondary-ion mass spectrometry to study the growth mode of a deposit on a substrate: Case of cobalt deposition on (100) copper surfaces, 35
investigation of microstructure and grain growth of polycrystalline silicon deposited using silane and disilane, 123
pulsed laser deposition of heteroepitaxial thin Pt films on MgO(100), 53

Indium
reflection XAFS from a Au/In composite film, 161
Indium oxide
large scale and low resistance ITO films formed at high deposition rates, 104
reflection XAFS from a Au/In composite film, 161
Inorganic compounds
temperature dependence of polarization holographic recording in thin films of $Se_{70}Ag_{15}I_{15}$, 119
Insulators
thermal conductivity of thin amorphous alumina films, 185
Ion bombardment
simple model for the formation of compressive stress in thin films by ion bombardment, 30
kinetics of $TiSi_2$ thin film formation at a single-crystal silicon surface by the Ti ion irradiation, 191
Ion implantation
valence manipulation and homojunction diode fabrication of chalcopyrite structure Cu–In–Se thin films, 149
Ion plating
optical properties of cubic boron nitride films made by a reactive ion plating method, 82

Iron
growth and structure of fcc Fe/Cu multilayers deposited on Si, 9

Langmuir–Blodgett films
displacement currents generated during compression of fatty acid and phospholipid monolayers at water–air interface, 164
edge-on Langmuir–Blodgett multilayers derived from disc-shaped multiyne mesogens, 265
intralayer and interlayer dimerization of rhodamine 6G in Langmuir–Blodgett films, 275
optical second-harmonic generation from polymerized Langmuir–Blodgett films of 2-(21′-docosenyl)amino-5-nitropyridine, 270
Raman imaging with plasmon surface polaritons, 48
selective dissociation of merocyanine J-aggregates with linearly polarized laser light studied by optical second harmonic generation, 173
Laser ablation
optical absorption and photoluminescence of unhydrogenated amorphous carbon films, 99
pulsed laser deposition of heteroepitaxial thin Pt films on MgO(100), 53
Laser irradiation
selective dissociation of merocyanine J-aggregates with linearly polarized laser light studied by optical second harmonic generation, 173
temperature dependence of polarization holographic recording in thin films of $Se_{70}Ag_{15}I_{15}$, 119
Lattice parameters
elastic constants of fcc {111} films. Part 1. Free monolayers, 230
Luminescence
growth and dielectric characterization of yttrium oxide thin films deposited on Si by r.f.-magnetron sputtering, 156
optical absorption and photoluminescence of unhydrogenated amorphous carbon films, 99

Metallization
selective electroless Ni deposition on a TiW underlayer for integrated circuit fabrication, 87
selective electroless Ni deposition onto Pd-activated Si for integrated circuit fabrication, 94
Metals
effect of specimen tilt on the measurement of film thickness and composition by back-scattered electron image contrast, 202
elastic constants of fcc {111} films. Part 1. Free monolayers, 230
electron conductivity of very thin metal films, 140
Monolayers
displacement currents generated during compression of fatty acid and phospholipid monolayers at water–air interface, 164
Multilayers
growth and structure of f.c.c. Fe/Cu multilayers deposited on Si, 9
selective electroless Ni deposition on a TiW underlayer for integrated circuit fabrication, 87
selective electroless Ni deposition onto Pd-activated Si for integrated circuit fabrication, 94

Nickel
selective electroless Ni deposition on a TiW underlayer for integrated circuit fabrication, 87
selective electroless Ni deposition onto Pd-activated Si for integrated circuit fabrication, 94
Nuclear reaction analysis
tribological transfer of polytetrafluorethylenylene onto a diamond-like carbon film, 224

Optical coatings
large scale and low resistance ITO films formed at high deposition rates, 104
Raman imaging with plasmon surface polaritons, 48
Optical properties
intralayer and interlayer dimerization of rhodamine 6G in Langmuir–Blodgett films, 275
investigations of titanium oxide films deposited by d.c. reactive magnetron sputtering in different sputtering pressures, 22
junction formation and characteristics of the $CdS/CuInSe_2$/metal interfaces, 129
optical absorption and photoluminescence of unhydrogenated amorphous carbon films, 99
optical properties of cubic boron nitride films made by a reactive ion plating method, 82
preparation and properties of electrodeposited ternary CdS_xSe_{1-x} and $Zn_xCd_{1-x}S$ films, 135
temperature dependence of polarization holographic recording in thin fims of $Se_{70}Ag_{15}I_{15}$, 119
Oxidation
growth of oxide layers on CrSi–O films, 110
X-ray photoelectron spectroscopy study of ultrathin oxide layers on Al and Si substrates, 219

Palladium
electromigration-resistant Cu–Pd alloy films, 238
Phosphorus
structural study of amorphous aluminium phosphate films by X-ray absorption spectroscopy, 207
Photoconductivity
preparation and properties of electrodeposited ternary CdS_xSe_{1-x} and $Zn_xCd_{1-x}S$ films, 135
Physical vapour deposition
modelling and characterization of columnar growth in evaporated films, 196
simple model for the formation of compressive stress in thin films by ion bombardment, 30
Piezeoelectric effect
investigation of thin AlN films for piezolayer-field effect transistor applications, 178
Plasma processing and deposition
large scale and low resistance ITO films formed at high deposition rates, 104
Platinum
pulsed laser deposition of heteroepitaxial thin Pt films on MgO(100), 53
Polymers
optical second-harmonic generation from polymerized Langmuir–Blodgett films of 2-(21′-docosenyl)amino-5-nitropyridine, 270
tribological transfer of polytetrafluoroethylenylene onto a diamond-like carbon film, 224
Pyrolysis
structural study of amorphous aluminium phosphate thin films by X-ray absorption spectroscopy, 207

Raman scattering
on the macromolecular mechanism of dissolution of As_2S_3 films in organic solutions, 215
Raman imaging with plasmon surface polaritons, 48
Reaction kinetics
close-spaced vapour transport of $CuInSe_2$, $CuGaSe_2$ and $Cu(Ga,In)Se_2$, 254
Rutherford backscattering spectroscopy
photoacoustic spectroscopy of $CuInSe_2$ thin films, 248

Scanning electron microscopy
photoacoustic spectroscopy of $CuInSe_2$ thin films, 248
effect of specimen tilt on the measurement of film thickness and composition by back-scattered electron image contrast, 202
Second harmonic generation
optical second-harmonic generation from polymerized Langmuir–Blodgett films of 2-(21′-docosenyl)amino-5-nitropyridine, 270
selective dissociation of merocyanine J-aggregates with linearly polarized laser light studies by optical second harmonic generation, 173
Secondary ion mass spectrometry
ability of secondary-ion mass spectrometry to study the growth mode of a deposit on a substrate: Case of cobalt deposition on (100) copper surfaces, 35
Auger electron spectroscopy investigations of segregation in Au–Pd and Ag–Pd alloy thin films, 39
Selenides
close-spaced vapour transport of $CuInSe_2$, $CuGaSe_2$ and $Cu(Ga,In)Se_2$, 254
Semiconductors
investigation of microstructure and grain growth of polycrystalline silicon deposited using silane and disilane, 123
photoacoustic spectroscopy of $CuInSe_2$ thin films, 248
valence manipulation and homojunction diode fabrication of chalcopyrite structure Cu–In–Se thin films, 149
Sensors
investigation of thin AlN films for piezolayer-field effect transistor applications, 178
Silicides
kinetics of $TiSi_2$ thin film formation at a single-crystal silicon surface by the Ti ion irradiation, 191
Silicon
selective electroless Ni deposition onto Pd-activatec Si integrated circuit fabrication, 94
X-ray photoelectron spectroscopy study of ultrathin oxide layers on Al and Si substrates, 219
Silicon nitride
analytic solution of an LPCVD reactor interwafer region, 15
Solar cells
role of substrate temperature and in-chamber annealing in H–Si bonding configurations in sputtered a-Si:H, 59
junction formation and characteristics of the $CdS/CuInSe_2$/metal interfaces, 129
Sputtering
growth and dielectric characterization of yttrium oxide thin films deposited on Si by r.f.-magnetron sputtering, 156
growth of oxide layers on CrSi–O films, 110
investigation of thin AlN films for piezolayer-field effect transistor applications, 178
investigations of titanium oxide films deposited by d.c. reactive magnetron sputtering in different sputtering pressures, 22

role of substrate temperature and in-chamber annealing in H–Si bonding configurations in sputtered a-Si:H, 59
Stress
simple model for the formation of compressive stress in thin films by ion bombardment, 30
two-dimensional finite-element analysis of elastic stresses in double-layer systems under combined surface normal and tangential loads, 65
Structural properties
investigations of titanium oxide films deposited by d.c. reactive magnetron sputtering in different sputtering pressures, 22
modelling and characterization of columnar growth in evaporated films, 196
preparation and properties of electrodeposited ternary CdS_xSe_{1-x} and $Zn_xCd_{1+x}S$ films, 135
Sulfides
on the macromolecular mechanism of dissolution of As_2S_3 films in organic solutions, 215
Surface morphology
investigation of microstructure and grain growth of polycrystalline silicon deposited using silane and disilane, 123
Surface plasmons
Raman imaging with plasmon surface polaritons, 48
Surface potential
displacement currents generated during compression of fatty acid and phospholipid monolayers at water–air interface, 164
Surface pressure
displacement currents generated during compression of fatty acid and phospholipid monolayers at water–air interface, 164
Surface segregation
Auger electron spectroscopy investigations of segregation in Au–Pd and Ag–Pd alloy thin films, 39
Surface tension
stability criteria for buckling of thin anodic films on aluminum, 74

Tin oxide
large scale and low resistance ITO films formed at high deposition rates, 104
Titanium oxide
investigations of titanium oxide films deposited by d.c. reactive magnetron sputtering in different sputtering pressures, 22
Tribology
tribological transfer of polytetrafluoroethylenylene onto a diamond-like carbon film, 224

Wetting
pulsed laser deposition of heteroepitaxial thin Pt films on MgO(100), 53

X-ray absorption
reflection XAFS from a Au/In composite film, 161
X-ray diffraction
photoacoustic spectroscopy of $CuInSe_2$ thin films, 248
X-ray photoelectron spectroscopy
X-ray photoelectron spectroscopy study of ultrathin oxide layers on Al and Si substrates, 219

Yttrium
growth and dielectric characterization of yttrium oxide thin films deposited on Si by r.f.-magnegron sputtering, 156
